

Product Category:	Router Solutions
Product Name:	Ether Port Switch Device (Communications Processor)
Product Description (SHORT):	The Ether Port Switch Device commonly known as the Communications Processor, is used to make a remote connection to IEDs connected to the various serial and ether ports. It acts as a transparent link between the IED and remote device or server thus no protocol or protocol-converter is implemented inside the Communications Processor.
Product Description (LONG):	<p>Mission critical substation communications call for the Ether Port Switch Device. The advanced connection management, coupled with the dual SIM failover &amp; dual antenna connectors makes the Ether Port Switch Device one of the most reliable wireless connectivity solution available. Although this device is capable of blistering speeds, it will fall back to slower technologies if the signal conditions are poor. New features will include:</p> <ul style="list-style-type: none"> <li>✓ 1U enclosure</li> <li>✓ UMTS Speeds</li> <li>✓ Dual SIM Feature</li> <li>✓ Multi RS232/ 485 ports</li> <li>✓ Multi Ether ports</li> <li>✓ Internal battery back up</li> <li>✓ LCD Display</li> </ul>
