

Product Category:	Modem Solutions
Product Name:	Range Extender
Product Description (SHORT):	The RangeExtender is a low power data radio (that does not require a license) and can extend theSmarToo range up to 10km with a clear line of sight.
Product Description (LONG):	The SmarToo Range Extender has been designed to accompany the SmarToo modem in areas where there is limited to no GSM signal. An installer often finds himself in an area ofno GSM coverage due to mountains and valleys. The SmarToo Range Extender works onthe principal of extending the serial communications – and NOT the GSM signal. The RangeExtender is a low power data radio (that does not require a license) and can extend theSmarToo range up to 10km with a clear line of sight.
