Product Category:	Other Solutions
Product Name:	Temparature Sensor
Product Description (SHORT):	The SmarToo Temperature probe provides a plug-in solution for Temperature monitoring on the SmarToo Inputs. The cable is standard 1 meter long, but it can be customized at an extra cost. For applications that require temperature monitoring or as compliment to the rest of the SmarToo Modem's offerings, temperature monitoring and site management can be done fast and reliably by adding as many temperature probes as what the Inputs on the SmarToo and Aux. Expansion Input units would provide.
Product Description (LONG):	The SmarToo Temperature probe provides a plug-in solution for Temperature monitoring on the SmarToo Inputs. The cable is standard 1 meter long, but it can be customized at an extra cost. For applications that require temperature monitoring or as compliment to the rest of the SmarToo Modem's offerings, temperature monitoring and site management can be done fast and reliably by adding as many temperature probes as what the Inputs on the SmarToo and Aux.
